

PHILOSOPHY AND THEORY OF ARTIFICIAL INTELLIGENCE (SUMMER 2023): FORMALITIES

Levin Hornischer // October 16, 2023

Welcome to the course *Philosophy and Theory of Artificial Intelligence*! This document collects the relevant organizational information.

Contact The lectures are given by Levin Hornischer (you can email me via Levin.Hornischer@lmu.de). They take place during the semester:

- Wednesdays, 12:15–13:45.

If you have any questions, please do not hesitate to contact me. My office hours are on Tuesdays, 14–16 by appointment via email.

Material All materials for the course are provided in the following GitHub repository:

<https://github.com/LevinHornischer/PhilTheoAI>

The syllabus for the seminar is provided there (including topics, objectives, prerequisites, etc.).

Assessment If you take the course for credits (9 ECTS-points), you need to write a term paper whose grade will be your final grade for the course. The formalities are as follows.

- Topic: You can choose a topic based on the readings in class, and I will also mention possible topics as the course progresses. To be sure, briefly get in touch with me, so I can approve it. A paradigm paper topic would be to take a philosophical theory which makes some prediction about AI and test it in an implementation. But coding is not required for the course, so a purely theoretical paper is fine, too.
- Word limit: 15-20 pages; max. 6000 words.
- Passing grades: 1.0, 1.3, 1.7, 2.0, 2.3, 2.7, 3.0, 3.3, 3.7, 4.0.
- Grading criteria: For an excellent grade, your paper should excel in the following criteria.

- You have a clearly articulated question and main claim, both of which have to be presented in the introduction (together with the motivation/relevance of the question and the context in which it occurs).
 - All required concepts are well explained, defined, and referenced. The essay is clearly and naturally structured in sections to answer the posed question.
 - You show that you are familiar with the relevant literature (refer to a substantial amount of publications that are not mentioned in the syllabus of the seminar). You show that you are able to reconstruct arguments from the relevant literature in a concise and accurate way.
 - You develop an independent and original argument supporting your main claim (not just reconstruct one from the literature). The argumentative structure is made explicit (by an overview in the introduction and by guiding the reader in the sections of the paper). You anticipate and discuss possible objections to your own arguments. The argument clearly states the assumptions (premises) and is logically correct.
 - The essay is typeset in an appealing format (e.g., 12pt, Times New Roman, 1.5 spacing, 3 cm margins), citations are according to academic standards and the references are presented in a detailed and consistent manner (e.g. APA).
 - The essay is written in clear and easy to understand language (as e.g. described in style books). There is no inappropriate language. Spelling and punctuation are largely correct.¹ (This is judged according to the standard of a good non-native speaker of English.)
 - And, of course, you should not plagiarize.
- Deadlines:
 - Registration period for exams and term papers: 15.01. 2024 – 26.01. 2024. (This registration is necessary for writing a term paper and getting the grade/credits.)

¹In case you are dyslexic, this of course does not apply—please let me know if this is the case (of course, I will treat this confidentially).

- Deadline for the submission of term papers: 25.03.2024.²
 - You receive your grade by: 08.04.2024.
- Submission: As PDF to me via email.³

²This deadline is fixed and I cannot change it. For extensions, you need to contact the examination office.

³These assessment formalities closely follow the suggestions of Alexander Reutlinger.
